Executive Summary

LearnLoop is a fictional Hyderabad-based EdTech start-up that runs live, mentor-led, project-based courses in Full-Stack Development, Data Science and AI for college students and early-career professionals. This document is its complete digital marketing strategy for a 30-day campaign running **1-30 December 2026**, built around the brand promise *Learn. Build. Get Hired. Repeat.*

The campaign moves the audience through four weekly themes - awareness, community, lead generation and conversion - across Instagram (primary), LinkedIn, YouTube and the website/blog. It is planned with a budget of Rs 1,50,000 and targets 2,00,000 unique accounts reached, 2,000 leads and 150 paid enrolments for the January 2027 cohorts.

- **Audience:** 3 personas - a 2nd-year B.Tech student, a service-company developer switching to AI, and a parent who funds the course.
- **Content mix:** Educational 37%, Informational 18%, Engagement 27%, Promotional 18% - fewer than 1 in 5 posts sells.
- **Calendar:** 60 planned posts in 30 days - 30 Instagram, 17 LinkedIn, 9 website pages and 4 YouTube videos, each written separately for its platform.
- **Hero campaigns:** #BuildIn30 project challenge, free 'Build Your First AI App' workshop and the 'New Year, New Skill' early-bird offer.
- **Measurement:** 20+ KPIs across the funnel, tracked weekly in Google Sheets with UTM-tagged links.

1. Business Overview

Item	Details
Business name	LearnLoop (fictional)
Industry	EdTech - tech-skills upskilling (education + technology)
Location	Hyderabad, Telangana; online classes, focus on South India
Products	Live 16-20 week cohorts: Full-Stack Web Development, Data Science & AI, and a weekend 'AI for Working Professionals' batch; free weekly workshops
Price range	Rs 4,999 - Rs 24,999 per course; EMI from Rs 999/month; workshops free
Unique selling points	Build 5 portfolio projects; 1:1 mentor code reviews; bilingual (English + Telugu) doubt support; placement-prep sessions; honest outcomes, no fake 'guaranteed job' claims
Tagline	Learn. Build. Get Hired. Repeat.
Brand voice	A friendly senior who has been there: practical, honest, a little playful, never hype
Assumed starting point	Instagram 1,200 followers; LinkedIn 800; YouTube 300 subscribers; website ~1,000 visits/month
Campaign window & budget	1-30 Dec 2026; Rs 1,50,000

2. Target Audience Profile

LearnLoop has one paying user group with two segments, plus an influencer group who often approves or pays. Each needs a different message and platform.

Attribute	Primary: Students	Secondary: Early-career professionals	Influencers: Parents
Age	18-23	22-28	42-55
Location	Tier-1/2 cities in Telangana, AP, Karnataka, Tamil Nadu	Hyderabad, Bengaluru, Chennai, Pune	Same regions as students; many in Tier-2/3 towns
Occupation	B.Tech / BCA / B.Sc students (2nd-4th year)	Developers, testers, support engineers at IT-services firms (0-4 yrs)	Salaried / small-business owners
Budget	Rs 3,000-8,000; needs EMI or parental support	Rs 8,000-25,000; self-funded	Pays for child; values EMI and proof
Goals	Internship, first job, portfolio, confidence	Switch to product/AI role, higher salary	Child gets a stable, well-paid job
Pain points	Theory-heavy syllabus, tutorial overload, no feedback, placement anxiety	No time, outdated skills, unsure which skill pays	Fear of scams, too many options, no proof
Online behaviour	Instagram Reels, YouTube, WhatsApp groups; evening use (7-11 PM)	LinkedIn on weekday mornings, YouTube long-form at weekends	WhatsApp, Facebook, YouTube (Telugu)
Buying triggers	Free workshop, peer reviews, clear roadmap, deadlines	Credible mentors, flexible weekend batch, success stories	Transparent fees, placement stats, call with counsellor
Main objection	'YouTube is free - why pay?'	'Will I finish it with a full-time job?'	'Is this legit?'

3. Buyer Personas

Three personas based on the audience profile. Every post in the calendar is written for at least one of them.

Persona 1 - Rahul Varma, 20: 'The Stuck Student'

"I've watched hundreds of hours of tutorials but I still can't build anything on my own."

Attribute	Details
Background	2nd-year B.Tech CSE at a Tier-2 college in Warangal; lives in a hostel; middle-income family
Goals	Land an internship by 3rd year; build a GitHub portfolio; feel job-ready
Pain points	Tutorial hell; no one reviews his code; confused between web dev, DSA and AI
Motivations	Peer success on LinkedIn; fear of being left behind at placements
Objections	Price; 'free content exists'; doubts he can keep up
Where he spends time	Instagram Reels (2-3 hrs/day), YouTube tutorials, college WhatsApp groups
Content that works	Relatable reels, roadmaps, project ideas, challenges, live doubt sessions
Key message	Stop watching, start building - ship 5 real projects with a mentor who checks your code.
Funnel path	Reel -> roadmap PDF -> #BuildIn30 -> free workshop -> EMI enrolment

Persona 2 - Priya Reddy, 24: 'The Career Switcher'

"I want to move into AI, but I can't quit my job to study."

Attribute	Details
Background	Software engineer at an IT-services company in Hyderabad, 1.5 years' experience
Goals	Switch to an AI/data role at a product company within a year
Pain points	Limited time (weekends only); unsure which certifications matter; maintenance work
Motivations	Better pay, interesting work, career growth
Objections	Time commitment; mentor credibility; course completion
Where she spends time	LinkedIn (weekday mornings), YouTube long-form, tech newsletters
Content that works	Switch plans, explainers (RAG, LLMs), learner stories, newsletters, LinkedIn Events
Key message	Switch to AI in 16 weekends - live mentors, real projects, built around your job.
Funnel path	LinkedIn post -> newsletter -> workshop event -> counselling call -> weekend cohort

Persona 3 - Srinivas Rao, 48: 'The Careful Parent'

"I'll pay if I know it really helps my son get a job."

Attribute	Details
Background	Government employee in Vijayawada; son in final-year B.Tech
Goals	A stable job for his son; value for money
Pain points	Many institutes, misleading ads, no way to judge quality
Motivations	His child's future and security
Objections	Fear of scams; lump-sum fees; online vs offline doubts

Attribute	Details
Where he spends time	WhatsApp, Facebook, Telugu YouTube channels
Content that works	Transparent fee breakdowns, real student stories, Telugu explainers, counsellor calls
Key message	Transparent fees, honest outcomes, EMI from Rs 999/month - talk to a counsellor in Telugu.
Funnel path	WhatsApp forward / Facebook post -> Telugu YouTube video -> counselling call -> enrolment

4. Marketing Objectives (SMART)

Business goal: fill the January 2027 cohorts with 150 new paying learners while building a brand that students trust.

#	Objective	Specific, measurable target (by 30 Dec 2026)	Funnel stage
1	Build awareness	Reach 2,00,000 unique accounts across Instagram, LinkedIn and YouTube (baseline ~15,000/month)	Awareness
2	Grow the community	Instagram 1,200 -> 5,000 followers; LinkedIn 800 -> 2,500; YouTube 300 -> 1,500 subscribers	Awareness / Interest
3	Drive engagement	Average engagement rate >= 5% on Instagram and >= 3% on LinkedIn; 300 #BuildIn30 submissions	Interest
4	Generate leads	2,000 unique leads (workshop sign-ups + roadmap downloads); landing-page conversion >= 12%	Consideration
5	Convert to sales	150 paid enrolments; customer acquisition cost (CAC) <= Rs 1,000	Conversion
6	Build SEO foundation	Publish 8 blogs + 1 landing page; 5 target keywords in Google top 30 within 90 days	Long-term awareness

5. Competitor Analysis

Observations below are general and qualitative, based on how these brands present themselves publicly. Offers and prices change, so verify before quoting.

Competitor	Positioning	Strengths	Gaps	Main channels	Opportunity for LearnLoop
Scaler	Premium, long career programmes for engineers	Strong mentor network, alumni proof, polished webinars	High price, long commitment, less beginner-friendly	LinkedIn, YouTube, webinars	Affordable, beginner-first cohorts for 2nd-year students
upGrad	University-partnered certificates and degrees	Brand trust, recognised credentials, big ad budgets	Generic, ad-heavy messaging; little community feel	Paid ads, YouTube, Instagram	Project-first proof and community content instead of hard selling
GeeksforGeeks	Coding-practice and interview-prep content platform with courses	Huge SEO library, affordable, trusted for DSA	Mostly self-paced; little personal mentoring or regional language	SEO/blog, YouTube	Mentorship, bilingual support and building real apps
Free YouTube creators (e.g. Apna College, CodeWithHarry)	Free tutorials from trusted personalities	Massive reach, relatable, free	One-way content; no code review or accountability - feeds 'tutorial hell'	YouTube, Instagram	Sell feedback and accountability; collaborate with smaller creators rather than compete

LearnLoop SWOT

Strengths	Weaknesses
Affordable; bilingual mentoring; project-first; nimble young brand	Small following; no alumni track record yet; limited budget

Opportunities	Threats
Rising demand for AI skills; under-served Telugu-speaking audience; tier-2 colleges	Big-budget competitors; free content; distrust of EdTech ads

Key takeaways

- Don't fight on ad spend or content volume - win on **feedback, accountability and trust**.
- Own the 'tutorial hell' problem in messaging; competitors rarely name it.
- Use transparency (fees, honest outcomes, no job guarantees) as a differentiator for parents.

6. Content Pillars

Four pillars keep content useful and stop the feed from turning into ads. Planned share vs what the 30-day calendar actually delivers (60 posts):

Pillar	Planned	In calendar	Purpose	Example topics	Main persona
Educational - 'Learn'	35%	37% (22)	Teach skills, build trust and saves	Roadmaps, speed builds, Git basics, LLMs explained, portfolio tips	Rahul, Priya
Informational - 'Know'	20%	18% (11)	Industry and career context	Hiring trends, internship timelines, service vs product, 2027 skills outlook	Priya, Srinivas
Engagement - 'Connect'	25%	27% (16)	Community, comments, shares, UGC	Memes, polls, quizzes, #BuildIn30, live Q&A, student spotlights	Rahul
Promotional - 'Grow'	20% max	18% (11)	Drive sign-ups and sales	Workshop invites, cohort launch, early-bird offer, learner stories	All three

- Rule of thumb: no more than one promotional post in every five on Instagram.
- Every promotional post must still give value (a demo, a story, a clear fee breakdown).

7. Platform Selection & Social Media Strategy

Platform selection

Platform	Selected?	Reason
Instagram	Yes - primary	Where students spend most of their time; Reels give the cheapest reach
LinkedIn	Yes	Professionals (Priya) and student job-seekers; builds credibility
YouTube	Yes	Long-form tutorials build deep trust; Telugu content reaches parents
Website / Blog	Yes	SEO traffic, landing pages and lead capture we own
WhatsApp Channel + Email	Yes - support	Reminders, nurturing leads, reaching parents
Facebook	Light	Repurpose posts and Telugu videos for parents only
X (Twitter)	No	Low audience fit for the budget

Platform-by-platform plan

Platform	Audience	Content focus	Formats	Frequency	Best time (IST)	Main KPI
Instagram	Students 18-23	Relatable, quick learning, challenges	Reels, carousels, stories, Lives	Daily post + daily stories	7-9 PM	Reach, engagement rate, saves
LinkedIn	Professionals, final-years	Career advice, credibility, events	Text posts, PDF carousels, polls, events, newsletter	4 posts/week	8-10 AM Mon-Fri	Engagement rate, event sign-ups
YouTube	Students, parents (Telugu)	In-depth tutorials, replays	Long-form + Shorts (re-cut Reels)	1 long video + 3 Shorts/week	Sun 11 AM	Watch time, subscribers
Website / Blog	Searchers with intent	SEO guides, landing pages	Blogs, landing pages, lead forms	2 posts/week	Publish 11 AM	Organic sessions, conversion rate
WhatsApp / Email	Leads, parents	Reminders, nurture, offers	Broadcasts, newsletters	2-3/week	Evening	Open rate, click rate

Best times are starting hypotheses; after two weeks they are reviewed against Instagram Insights and LinkedIn Analytics.

How the platforms work together

- **Repurposing loop:** 1 YouTube tutorial -> 3 Reels/Shorts -> 1 Instagram carousel -> 1 LinkedIn PDF carousel -> 1 blog post.
- **Different copy per platform:** casual, emoji-friendly on Instagram; professional and story-led on LinkedIn; keyword-led on the website.
- **Community management:** reply to comments within 2 hours (9 AM-10 PM); keyword DM automation ('CODE', 'NEWYEAR').
- **Paid support:** boost the top 20% of organic posts each week; retarget video viewers and site visitors with workshop and offer ads.

8. 30-Day Content Calendar

Campaign runs Tuesday 1 December to Wednesday 30 December 2026. Each week has one theme and one goal. The full calendar with hashtags and status columns is in the Excel file content-calendar/30-day-content-calendar.xlsx.

Week	Dates	Theme	Goal	Hero content
W1	01 Dec - 07 Dec	Stop Watching, Start Building	Awareness	Relatable 'tutorial hell' reels + free Full-Stack Roadmap 2027 PDF
W2	08 Dec - 14 Dec	#BuildIn30 Challenge	Engagement & community	UGC challenge: build and post one mini-project a week, win free course seats
W3	15 Dec - 21 Dec	AI Skills Week + Free Workshop	Lead generation	Free live workshop 'Build Your First AI App in 90 Minutes' (Sat 19 Dec, 6 PM)
W4	22 Dec - 30 Dec	New Year, New Skill	Conversion	Early-bird offer for January cohorts: 25% off + EMI from Rs 999/month, ends 31 Dec

Platform	Posts in 30 days
Instagram	30 (daily)
LinkedIn	17 (4/week)
Website / Blog	9 (2/week)
YouTube	4 (weekly long-form)
Total	60

Full calendar

Day	Date	Platform	Pillar	Format	Topic / Title	CTA
1	Tue 01 Dec	Instagram	Engagement	Reel	POV: 47 tutorials watched, 0 projects built (relatable meme, launches week theme)	Comment 'SAME' + follow
1	Tue 01 Dec	LinkedIn	Informational	Text post	Why proof-of-work beats certificates in India's fresher hiring	Comment your view

9. Campaign Ideas

Campaign	Objective	Platforms	How it works	Timing	Success measure
Stop Watching, Start Building	Awareness	Instagram, YouTube	Relatable reels about tutorial hell + free Full-Stack Roadmap 2027 PDF as lead magnet	Week 1	Reach 60k; 600 PDF downloads
#BuildIn30 Challenge	Engagement, UGC	Instagram, LinkedIn	Post one mini-project a week with #BuildIn30; weekly spotlights; 10 free course seats for winners	Weeks 2-3	300 submissions
Build Your First AI App (free workshop)	Lead generation	All + landing page	90-min live build on Sat 19 Dec; registration form; reminders by WhatsApp/email; replay on YouTube	Week 3	1,500 sign-ups; 40% attend
New Year, New Skill	Conversion	Instagram, LinkedIn, email, ads	25% early-bird off January cohorts + EMI from Rs 999/month; countdown stories; closes 31 Dec	Week 4	150 enrolments
Campus Ambassadors	Reach + referrals	WhatsApp, Instagram	20 students across 20 colleges share referral codes; earn certificate + stipend per enrolment	Whole month	20 referral enrolments
Telugu Tech Talks	Trust with parents	YouTube, Facebook, WhatsApp	Short Telugu explainers on careers, fees and outcomes; counsellor call CTA	Weekly	100 counselling calls
Micro-influencer collabs	Reach + credibility	Instagram, YouTube	5 Telugu/English tech creators (10k-100k followers) review a project-building session	Weeks 2-4	Rs 30 or less per lead
Code Meme Mondays	Engagement habit	Instagram	A recurring weekly meme slot the audience expects and shares	Every Monday	Shares per post

10. Content Formats

Format	Platform	Best for	Best practice
Reels / Shorts	Instagram, YouTube	Reach, awareness	15-45 sec, hook in the first 2 sec, captions on, trending audio
Carousels	Instagram	Saves, education	7-10 slides, bold cover headline, CTA on last slide
Stories (polls, quizzes, countdowns)	Instagram	Daily engagement, reminders	Daily; use stickers; save highlights for workshop and FAQs
Instagram Live / workshops	Instagram, YouTube	Trust, leads	Announce 3 days ahead; reminders; pin replay
Text posts	LinkedIn	Thought leadership	Short lines, story-led, question at the end, 3-5 hashtags
Document (PDF) carousels	LinkedIn	Saves, reach	8-12 pages, one idea per page
Polls	LinkedIn, Instagram	Research + engagement	Share results in a follow-up post
LinkedIn Events & newsletter	LinkedIn	Registrations, retention	Clear date/time/value; monthly newsletter
Long-form video	YouTube	Deep learning, search	Chapters, keyword-led title, custom thumbnail
SEO blog posts	Website	Organic traffic	1,200-1,800 words, one primary keyword, FAQs, internal links
Landing pages	Website	Conversions	One goal, short form, social proof, mobile-first
Infographics & memes	Instagram, LinkedIn	Shares	On-brand colours, simple, relatable
Testimonials / UGC	All	Social proof	Real names (with consent), specific results
Email & WhatsApp broadcasts	Owned channels	Nurture, reminders	Personal tone, one CTA, 2-3 per week

11. Hashtag & Keyword Strategy

Hashtag tiers

Tier	Purpose	Hashtags
Branded	Build brand recall, collect UGC	#LearnLoop #LearnBuildGetHired #BuildIn30 + weekly campaign tag
Niche	Reach people interested in the topic	#fullstackdeveloper #webdevelopment #pythonprogramming #aiforbeginners #machinelearning #100daysofcode #codinglife #javascript
Community / regional	Reach students and local tech circles	#btechlife #engineeringstudents #placementprep #hyderabadtech #telugutech
Broad	Extra discovery (use sparingly)	#coding #programming #technology #ai #careers

Usage rules by platform

- **Instagram:** 8-12 hashtags per post - 2 branded, 3-4 niche, 2 regional, 2 broad. Rotate niche tags to avoid repetition.
- **LinkedIn:** 3-5 hashtags - brand + campaign + 1-2 topic tags.
- **YouTube:** 3 hashtags in the description; keywords in title, description and tags.
- **Website:** no hashtags - one primary keyword per page plus 2-3 related keywords.

SEO keyword map

Keyword	Type	Search intent	Target page / content	Priority
full stack developer roadmap 2027	Long-tail	Informational	Blog: Full-Stack Developer Roadmap 2027	High
how to get internship in 2nd year btech	Long-tail	Informational	Blog: Internship in 2nd year B.Tech	High
coding projects for beginners	Short	Informational	Blog: 25 Beginner Coding Projects	High
ai course for beginners	Short	Commercial	Blog: AI for Beginners + AI cohort page	High
service vs product based company	Long-tail	Informational	Blog: Service vs Product Companies	Medium
data science vs full stack	Long-tail	Informational	Blog: Data Science vs Full-Stack vs AI	Medium
coding course in hyderabad	Local	Commercial / local	Guide: How to Choose a Coding Course in Hyderabad	High
full stack development course online with projects	Long-tail	Transactional	Full-Stack cohort page	High
free ai workshop for students	Long-tail	Transactional	Workshop landing page	Medium
developer portfolio tips	Long-tail	Informational	Blog: Developer Portfolio That Gets Interviews	Medium

How keywords are researched and validated

- **Google Trends:** compare terms such as 'AI course' vs 'data science course' vs 'full stack course' for India and Telangana over 12 months; pick rising terms.
- **Keyword tools:** check volume and difficulty in Google Keyword Planner or Ubersuggest; prefer long-tail terms with lower competition.

- **Google autocomplete, 'People also ask' and AnswerThePublic:** collect real questions for blog FAQs.
- **Review monthly** in Google Search Console and update the keyword map.

12. Marketing KPI List

Stage	KPI	How it's calculated	30-day target	Tracked in
Awareness	Reach	Unique accounts that saw content	2,00,000	IG Insights, LinkedIn Analytics, YT Studio
Awareness	Impressions	Total times content was shown	6,00,000	Platform analytics
Awareness	Video views (Reels/Shorts)	Plays of 3 seconds or more	1,50,000	IG Insights, YT Studio
Awareness	Net new followers	End followers - start followers	IG +3,800; LI +1,700; YT +1,200	Platform analytics
Engagement	Engagement rate (by reach)	(Likes + comments + shares + saves) / reach x 100	IG >= 5%; LI >= 3%	Google Sheets dashboard
Engagement	Saves + shares per carousel	Average per post	>= 60	IG Insights
Engagement	UGC submissions	Posts using #BuildIn30	300	Hashtag search
Engagement	Live / workshop attendance rate	Attendees / registrants x 100	>= 40%	Zoom / YouTube Live
Traffic	Click-through rate (CTR)	Clicks / impressions x 100	Ads >= 1.2%	Meta & LinkedIn Ads Manager
Traffic	Website sessions from social	Sessions with UTM source = social	12,000	Google Analytics 4
Leads	Leads	Workshop sign-ups + roadmap downloads (unique)	2,000	Form / CRM sheet
Leads	Landing-page conversion rate	Sign-ups / visitors x 100	>= 12%	GA4
Leads	Cost per lead (CPL)	Ad spend / leads from ads	<= Rs 60	Ads Manager + sheet
Conversion	Paid enrolments	New paying learners	150	Payment records
Conversion	Lead-to-enrolment rate	Enrolments / leads x 100	>= 7.5%	Sheet
Conversion	Customer acquisition cost (CAC)	Total marketing spend / new paying learners	<= Rs 1,000	Sheet
Conversion	Return on ad spend (ROAS)	Revenue from ads / ad spend	>= 5x	Ads Manager + sheet
SEO	Organic sessions	Visits from Google search	+50% by Mar 2027	GA4, Search Console
SEO	Keyword rankings	Position for target keywords	5 keywords in top 30 in 90 days	Search Console
Retention	Email / WhatsApp open rate	Opens / delivered x 100	Email >= 30%	Email tool
Advocacy	Referral enrolments	Enrolments with ambassador code	20	Sheet

Measurement plan

- **UTM links on every post:** e.g. ?utm_source=instagram&utm_medium=social&utm_campaign=newyearnewskill_dec26&utm_content=d22_reel.
- **Weekly review (every Monday):** update the KPI Tracker sheet, compare against targets, and note top and bottom 3 posts.

- **Optimise:** after week 2, move ad budget to the platform with the lowest cost per lead; A/B test reel hooks and thumbnails.
- **Final report (31 Dec):** results vs targets, learnings, and plan for January.

13. Budget, Tools & Risks

Budget line	Amount	Share
Meta ads (Instagram + Facebook)	Rs 60,000	40%
Google / YouTube ads	Rs 22,500	15%
LinkedIn ads	Rs 22,500	15%
Micro-influencer collaborations	Rs 30,000	20%
Design tools & merch prizes	Rs 7,500	5%
Contingency	Rs 7,500	5%
Total	Rs 1,50,000	100%

Tool	Used for
Google Sheets / Excel	Content calendar, KPI tracker, budget
Canva	Reels covers, carousels, infographics, thumbnails
Google Trends & keyword tools	Topic and keyword research
Google Docs	Blog drafts and this strategy document
Meta Business Suite, LinkedIn, YouTube Studio	Scheduling, analytics
Google Analytics 4 & Search Console	Website traffic, conversions, SEO

Risk	Mitigation
Low early engagement	Boost best posts; collab with creators; post more Reels
Workshop no-shows	3 reminders (24h, 3h, 15 min) via WhatsApp + email; replay as backup
Negative comments / trust issues	Reply transparently within 2 hours; show fee breakdown; never promise jobs
Festive-season distraction (Christmas, New Year)	Light, fun content on 25 Dec; urgency-led offer posts in the final week

14. Conclusion

This strategy gives LearnLoop a clear path from being unknown to filling its January cohorts: understand three distinct personas, earn trust with mostly non-promotional content, give each platform its own job, and measure every step of the funnel. The biggest lesson from planning it is that **value comes before the sale** - the free roadmap, the #BuildIn30 challenge and the workshop do the persuading, so the offer in week 4 feels like a natural next step rather than an ad.
